Assessment Module Overview

This sample displays just a few of the 90 pre-set assessment categories you can choose from included in **CareManager Pro**. Each category has Issues choices with Answer Wizards. Your assessment setup choices are easily customizable to edit / modify or add new categories or delete. You can add your own required or desired issues and answer wizards.

You simply select and load the desired Categories into your Client Assessment module. Then just a select issue, click (check box) edit your answer wizard, view and print a clear, easy to read Client Assessment Report. Like the one you're reading now. Complete your assessment in minutes. Later, using the integrated Care Plan module you quickly complete your Plan, Goals and Resolution date on any issue. Then you can print your Assessment combined with Plan of Care. All narrative fields have Spell-Check. No more typos. And you can import your logo to appear on the header of your report.

CareManager Pro's Assessment Module is user-friendly, easy to learn and master. One of many reasons why our software is the preferred choice of hundreds of professionals. Our no-obligation full-version trial runs for 30 days. Plenty of time to click away, explore and evaluate to make an informed purchase decision.

This sample below is of a Activities of Daily Living (ADL) & Instrumental Activities of Daily Living (IADL) Assessment showing categories with all your "answer" choices. Only the choices you've "checked" for your client's assessment will appear on your report. You can also include other Category choices to this assessment.
